## Toddler Kushions for Edges

Model 5004/5024/5034

1. Measure amount of foam needed. Cut to length with scissors or kitchen knife making sure to get a straight cut.
2. Thoroughly clean surface area and use rubbing alcohol to wipe down back of foam and surface mounting area. This will help the adhesive attach securely to both surfaces.
3. Start on one end of foam and roll tape out along one edge only. Press tape firmly onto foam as you go. Cut off tape as needed. Do not stretch foam.
4. Gradually pull backing from tape and attach foam Kushion to top of surface. Press and rub firmly as you go. Allow several hours for tape to bond.

**\* Not for use on fireplace hearths.**

**\* Safe for most surfaces.**

**\* Because all furniture finishes are different, we cannot guarantee furniture finishes, only softer edges.**

**\* If there is any adhesive residue left on furniture when product is removed use Goo Gone on a cloth to remove.**

This product is not a substitute for adult supervision.
